

Demo #07 - Handin Template

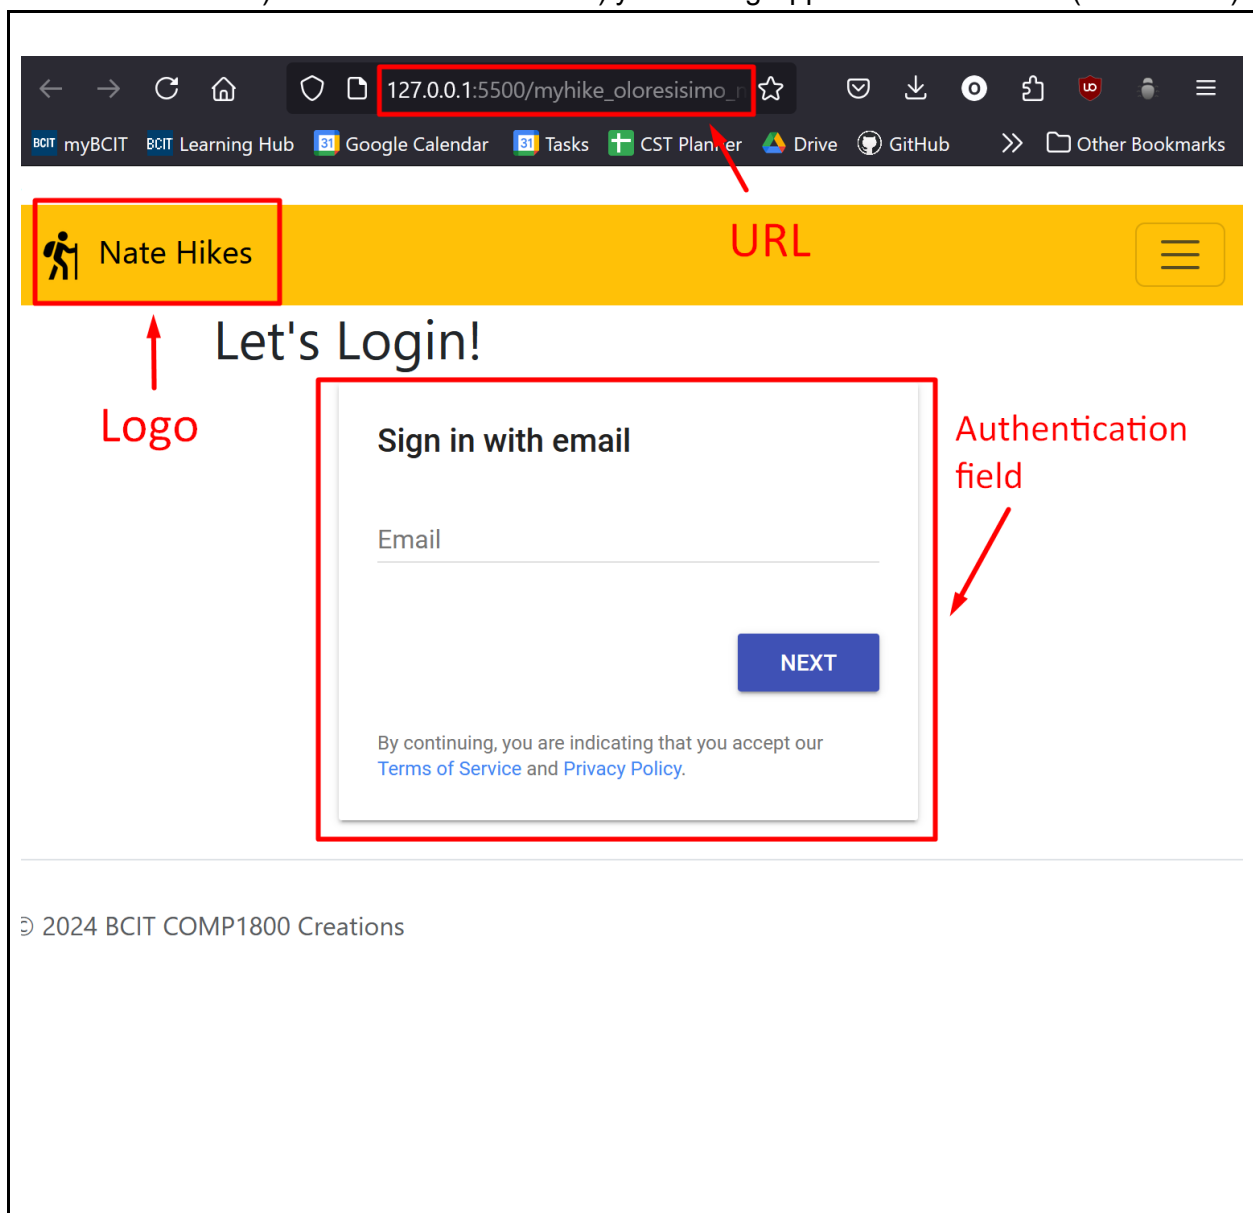

(Firebase Intro & Authentication)

- Please “Make a copy” of this google doc file for yourself.
- Please name the file: *lastname_firstname_demo07.pdf*

Screen Capture #1: Show your hiking login.html page

This screen capture should show:

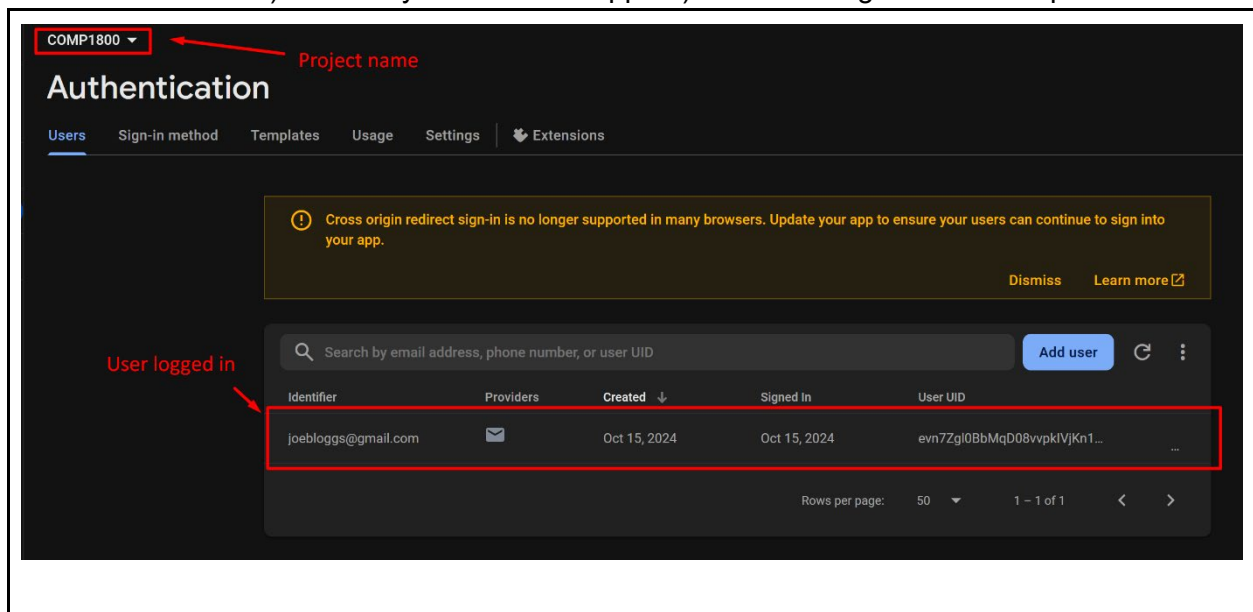

- The Firebase UI widget
- Annotate: 1) URL in the search bar 2) your Hiking App name somewhere (customized)

Screen Capture #2: Show user authenticated in your Firebase Console

This screen capture should show:

- At least one user who successfully logged-in
- Annotate: 1) name of your Firebase App 2) Row showing the timestamp and User UID

Screen Capture #3: Show your hiking main.html page

This screen capture should show:

- “You are logged in to Elmo’s Hiking App” message (customized in some way)
- Annotate: 1) URL in the search bar 2) the message for the logged in user (customized) 3) name of the user (personalized)

The screenshot displays a web browser window with the address bar showing the URL `127.0.0.1:5500/myhike_oloresisimo_...`. The browser's bookmark bar includes links to `myBCIT`, `Learning Hub`, `Google Calendar`, `Tasks`, `CST Planner`, `Drive`, `GitHub`, and `Other Bookmarks`.

The web page features a yellow header bar with a logo of a hiker and the text `Nate Hikes`. Below the header, a large white box contains the text `Good morning, Joe Bloggs`. Underneath this, the text `Ready to conquer another hike?` is displayed. At the bottom of the page, the copyright notice `© 2024 BCIT COMP1800 Creations` is visible.

The browser's developer console is open, showing the `Console` tab. It displays several log entries, including a `GET http://127.0.0.1:5500/favicon.ico` request resulting in a `404 Not Found` error. A red box highlights a log entry that reads `Joe Bloggs is logged in to Nate Hikes.`.

Red arrows and labels point to specific elements:
 - `Brand name and logo` points to the `Nate Hikes` header.
 - `URL` points to the address bar.
 - `Custom greeting message` points to the `Good morning, Joe Bloggs` text.
 - `Console message` points to the `Joe Bloggs is logged in to Nate Hikes.` log entry.
